Bright Anyawe

Remote front-end developer. Tema, Ghana.
anyawe.work@gmail.com linkedin.com/in/brightanyawe github.com/brightanyawe

Summary

Dedicated and motivated web developer with a year of experience creating accessible, user-friendly web applications. Passionate about leveraging technology to solve societal problems and continuously learning to improve my craft.

Education

The Odin Project (TOP)
Front-End Web Development
October 2023 – Present

Technical Skills and Framework

- **Programming Languages:** JavaScript, HTML (Semantic), CSS3

- **Frameworks & Libraries:** React.js, Vitest, React Testing Library

- **Version Control:** Git, GitHub

- **Testing:** Unit Testing (React Testing Library)

- **Additional Skills:** Responsive Web Design, Local Storage Implementation

Experience

- **Proficient in integrating RESTful APIs** to enable seamless backend communication and dynamic data handling in web applications.

- **Skilled in implementing user authentication** systems to secure access and enhance website functionality.

- **Expert in creating responsive and mobile-friendly designs**, ensuring optimal user experience across devices.

- **Experienced in managing user data with local storage**, providing persistence and enhanced application usability.

- **Adept at writing and executing unit tests** using React Testing Library to maintain functionality, reliability, and code quality.

Projects

- **Todo List App:** Developed a feature-rich to-do list application with CRUD functionality, local storage, and responsive design.

- **CV Builder:** Created an interactive web app that allows users to design and download their custom CVs.

- **E-Commerce Web App:** Built a scalable e-commerce platform with React, featuring dynamic product pages, cart functionality, and user authentication.

Soft Skills

- Problem-Solving and Analytical Thinking
- Strong Communication and Collaboration Skills
- Adaptability and Continuous Learning

Additional Notes

- Open to remote and on-site opportunities.
- Actively expanding knowledge of backend technologies such as Node.js and MongoDB to enhance full-stack development skills.
